

# Installing Boca Printer

The Boca Lemur 2P printer can be installed as a USB printer or an Ethernet printer. These instructions will illustrate how to install the Boca L2P printer as a USB printer on Windows 7.

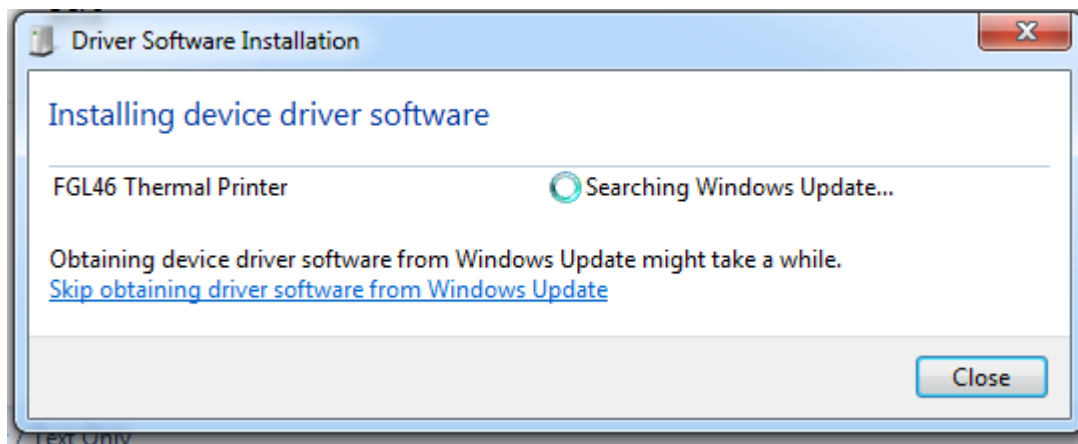

Begin by connecting the printer to power.

Plug one end of the USB cable into the printer USB port.

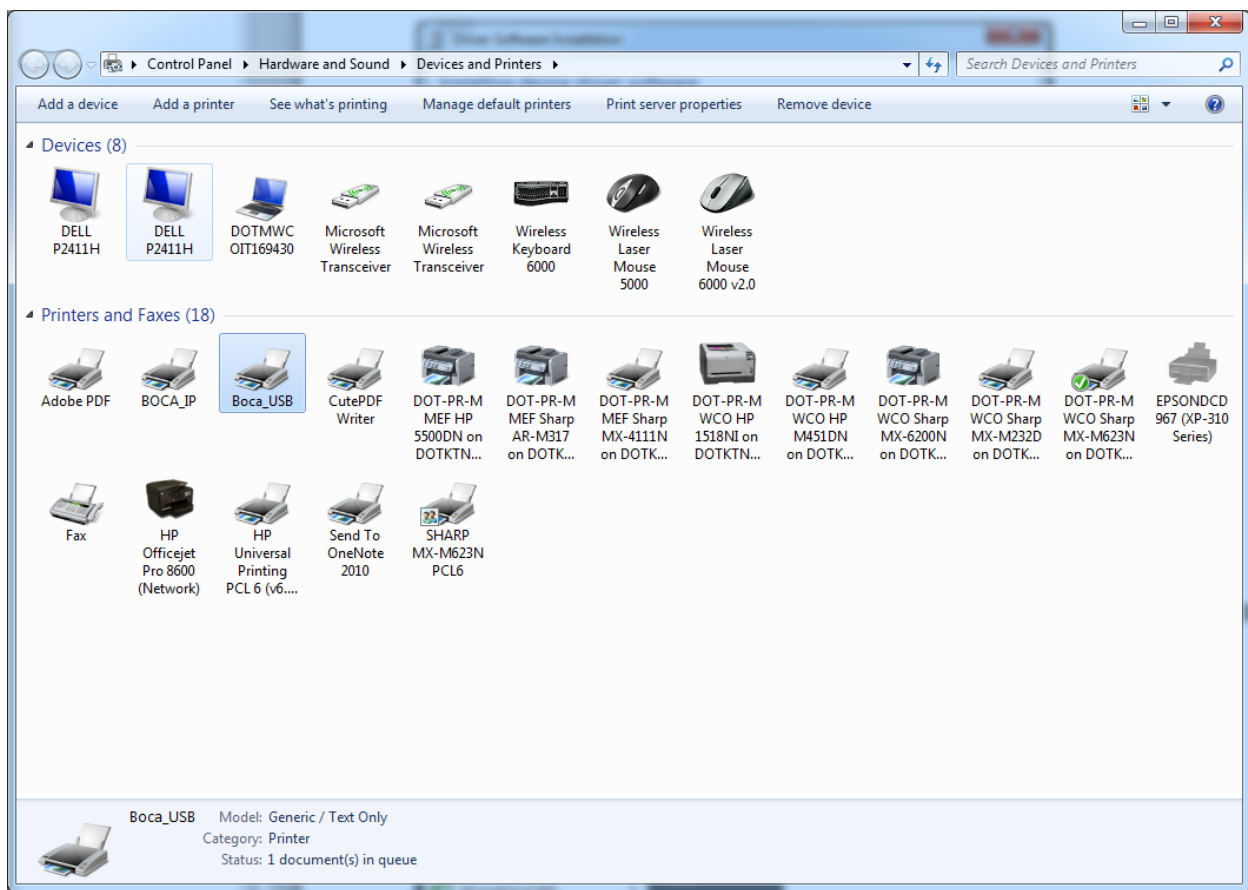

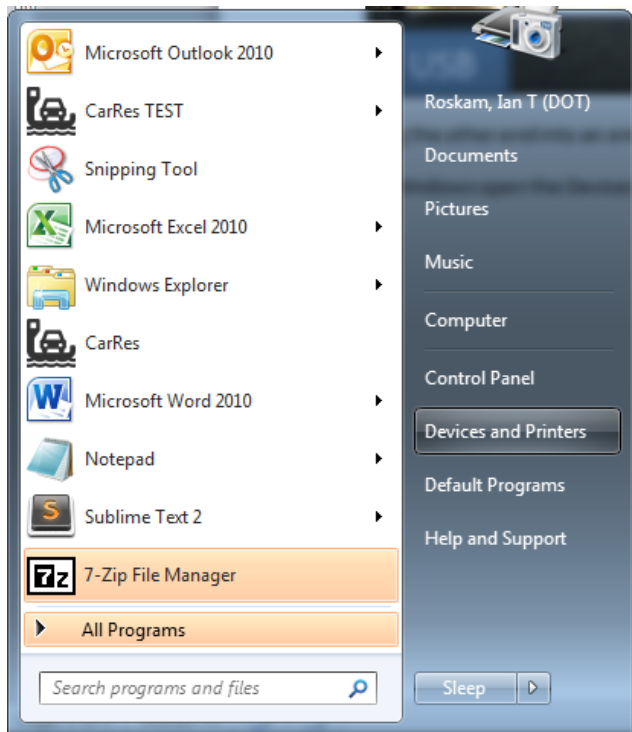

Plug the other end into an empty USB port on the PC.

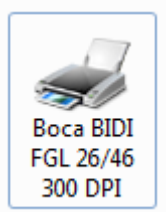

Turn the printer on. The installation process will begin automatically.

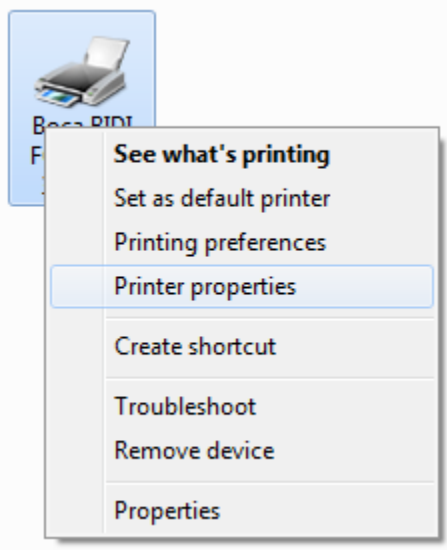

In Windows open the Devices and Printers application from the Start menu.

Find this printer

Right click on the printer and select "Printer Properties"

On the General tab rename the printer Boca.

The image shows a Windows-style dialog box titled "Boca Properties". It has a tabbed interface with the following tabs: Security, Device Settings, Printer Commands, Font Selection, General, Sharing, Ports, Advanced, and Color Management. The "General" tab is currently selected. Inside the dialog, there is a printer icon next to a text field containing the name "Boca". Below this, there are fields for "Location:" and "Comment:". Further down, the "Model:" is set to "Generic / Text Only". A "Features" section contains several options: "Color: No", "Double-sided: No", "Staple: No", "Speed: Unknown", and "Maximum resolution: 600 dpi". To the right of these features is a "Paper available:" section with a list box showing "Letter". At the bottom of the dialog, there are three buttons: "Preferences...", "Print Test Page", and a group containing "OK", "Cancel", and "Apply".

**Boca Properties**

Security | Device Settings | Printer Commands | Font Selection

 Boca

Location:

Comment:

Model: Generic / Text Only

Features

Color: No      Paper available: Letter

Double-sided: No

Staple: No

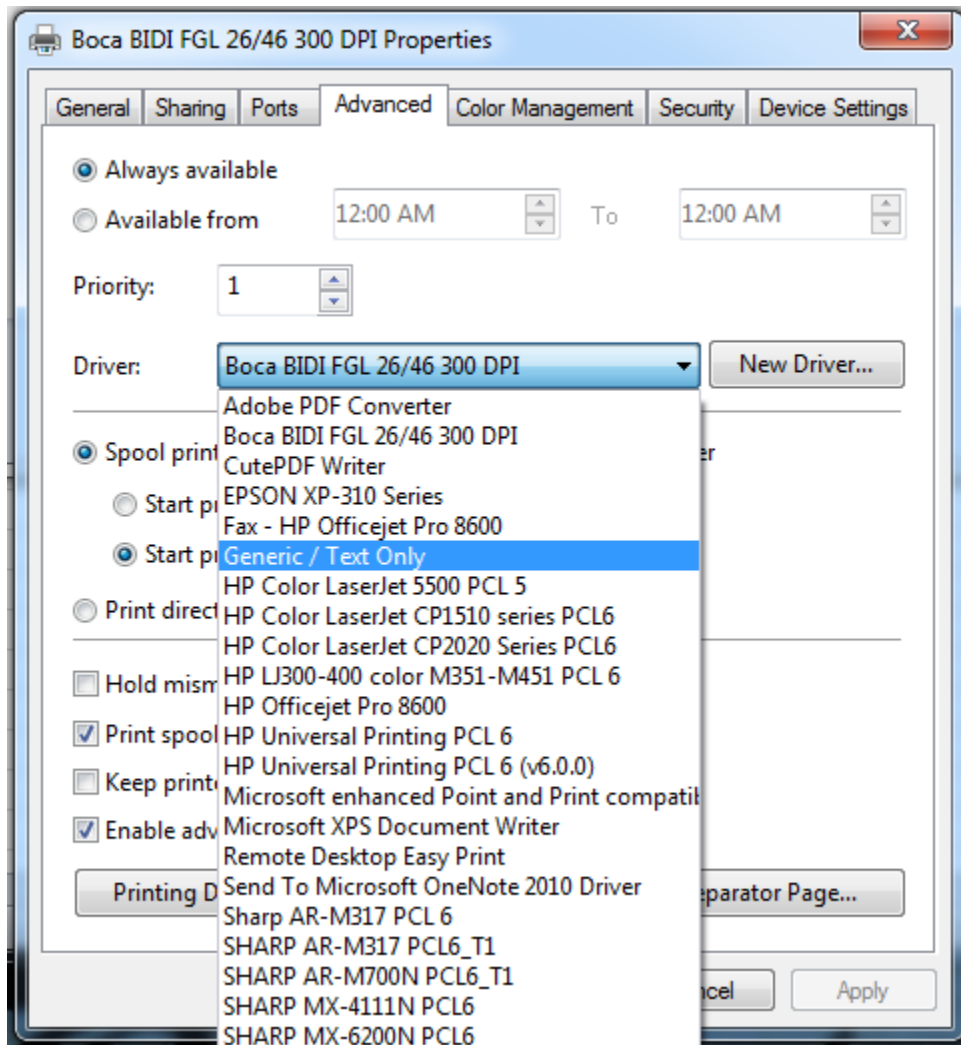

Speed: Unknown

Maximum resolution: 600 dpi

Preferences...      Print Test Page

OK      Cancel      Apply

On the Advanced tab change the driver to “Generic / Text Only” and press OK.

That concludes installing a Boca printer in Windows 7. If needed follow up with “Setting Printer Queues”.
